Experience

Professional Service Consultant

Bright Brains Information Technology

Brooklyn, NY

June 2025 – August 2026

- Configured and deployed Nexthink DEX solutions for **8+ enterprise clients**, integrating monitoring across **6,000+ managed endpoints** and improving platform visibility and scalability.
- Configured and deployed **15+ remote action scripts and parameters** to integrate Nexthink users with ITSM platforms (ServiceNow, Jira), reducing incident detection-to-ticket time by **~40%**.
- Built custom queries and real-time dashboards surfacing endpoint health KPIs, enabling IT teams to cut mean time-to-resolution (MTTR) by an estimated **30%** per engagement.

Undergraduate Research Assistant

Pennsylvania State University

University Park, PA

January 2024 – May 2024

- Co-authored **2 textbook chapters** on CNNs, gradient descent, and image classification (MNIST / Fashion-MNIST), contributing to a course adopted by **40+ students**.
 - Collaborated on a research paper training visual transformers, running experiments that achieved **92%+ classification accuracy** on benchmark datasets using PyTorch.
 - Wrote and reviewed **15+ lecture questions** and problem sets across **4-chapter drafts** to ensure technical accuracy and student understanding in published course materials.
-

Projects

FencingTime (JavaScript, PostgreSQL)

- Built a full-stack tool using JavaScript and SQL, implementing a live tournament tracking platform designed for fencing events.
- Implemented CRUD functionality for fencers, events, and participant rosters through a dynamic frontend interface backed by a relational database.
- Engineered pool draw and direct elimination (DE) bracket generation with automated result propagation and live rating updates.

NASA APOD (React, Vercel)

- Built a full-stack React app that fetches and displays NASA's daily Astronomy Picture of the Day via public API integration, dynamically rendering both image and video content.
 - Designed a responsive interface with animated sidebar and staggered mount/unmount transitions for smooth UI state handling.
 - Deployed to a custom subdomain with environment-based API key management and integrated analytics tracking.
-

Education

Master of Science (M.S.) in Computer Science

Georgia Institute of Technology

May 2027

Atlanta, GA

Specialization in Computational Perception and Robotics

Bachelor of Science (B.S.) in Computer Science

Pennsylvania State University

May 2024

State College, PA

Minor in Mathematics

Minor in Cybersecurity Foundations

Skills

Languages: Python, Java, SQL, C, C++, JavaScript, HTML/CSS

Frameworks & Tools: React, Git, Linux, NoSQL

Platforms & Certs: ITSM Integration, IT Support, MS Office Specialist Master (2019)
